Updating an EuroOffice Extension

The recommended way to update your EuroOffice extensions is by using the update mechanism in the *Extension Manager*.

Step 1: Start OpenOffice.org and open the *Extension Manager* from the *Tools* menu.

Step 2: Press the *Check for Updates...* button and wait until OpenOffice.org searches for update possibilities for all of your installed extensions.

Step 3: Select the required extension updates from the list, and press *Install*.

Step 4: Restart OpenOffice.org. Remember to close the Quickstarter also before starting OpenOffice.org again.

Your updated extensions should be working perfectly now!

Alternatively, you can always **download and install the newest version** of the free extensions from our website (www.multiracio.com/eurooffice).

Note: Customized dictionaries and maps will be lost during the update, because OpenOffice deletes the folders of the extensions in the beginning of the update process.
